SUMMARY

Aspiring Data Scientist and Analytics Professional with 1.8 years of experience as an Officer – AI in aggregate plant and quarry operations, combining strong analytical capabilities with practical business and operational expertise. Experienced in developing and enhancing ERP systems, building MIS reports and dashboards, and leveraging Advanced Excel, SQL, Power BI, Python, and AI-powered tools to analyze data and support decision-making. Possess hands-on experience in production monitoring, dispatch management, fleet analytics, weighbridge operations, maintenance tracking, and cost analysis. Skilled in transforming complex operational data into actionable insights, identifying improvement opportunities, and delivering data-driven solutions that enhance operational efficiency, productivity, and overall business performance.

EXPERIENCE

Officer – Artificial Intelligence Process - SGX Minerals Pvt Ltd

03/25 – Present

- Developed and enhanced ERP systems to streamline operational processes, improve data accuracy, and support business decision-making.
 - Designed and maintained MIS reports, dashboards, and automated reporting solutions using Advanced Excel, Power BI, and AI-powered tools.
-

EDUCATION

Certification in Full Stack Data Science and AI

78%

Bachelor of Science (B.Sc.) in Physics

62 %

SKILLS

-
- Data Analysis & Business Intelligence
 - Advanced Excel & MIS Reporting
 - ERP Development & Enhancement
 - Dashboard Development & AI Productivity Tools
 - Accounts, Quarry, Plant & Dispatch Operations
 - Team Leadership & Collaboration

CERTIFICATE

Data Analytics and Visualization Virtual Experience Certificate [\[Certificate Link\]](#)

06/23-07/23

Project Understanding, Data Cleaning and Modeling, Data Visualization and Storytelling

PERSONAL PROJECTS

-
- **Result-Oriented MIS Reporting & Analysis** – Developed and managed comprehensive MIS reports covering **Quarry Operations, Boulder Production, Vehicle Dispatch, Plant Production, Machinery Availability, Fuel Consumption, Maintenance, and Daily Operations**, enabling management to monitor KPIs and take faster, data-driven decisions.
 - **MIS Dashboard & Business Intelligence** – Designed and implemented **interactive MIS dashboards** with KPI cards, Pivot Tables, charts, target-vs-achievement analysis, FTD/MTD performance, vehicle utilization, production trends, and operational summaries for **real-time performance monitoring and management review**.
 - **ERP & Process Automation** – Worked on **ERP-based automation and digital transformation** of operational processes, including **maintenance management, daily log sheets, fuel management, PM schedules, breakdown tracking, spare-parts inventory, transporter bill verification, attendance, and task management**, reducing manual work and improving data accuracy.
 - **Plant & Quarry Operations – End-to-End Knowledge** – Developed comprehensive working knowledge of **quarry-to-plant operations**, including drilling, blasting, boulder production, excavator and loader operations, tipper transportation, plant feeding, crushing, production, dispatch, machinery utilization, maintenance coordination, and operational bottleneck identification.
 - **Complete IT Infrastructure & Technical Support** – Managed and supported day-to-day **IT infrastructure and office operations**, including **CCTV camera systems, internet and network connectivity, Wi-Fi, computers, printers, biometric/attendance systems, software and hardware troubleshooting, server and system support, and weighbridge integration**. Provided technical assistance for **weighbridge systems, vehicle dispatch operations, office IT requirements, user support, system maintenance, and coordination with vendors**, ensuring smooth and uninterrupted business operations.
